

Thinking Faster

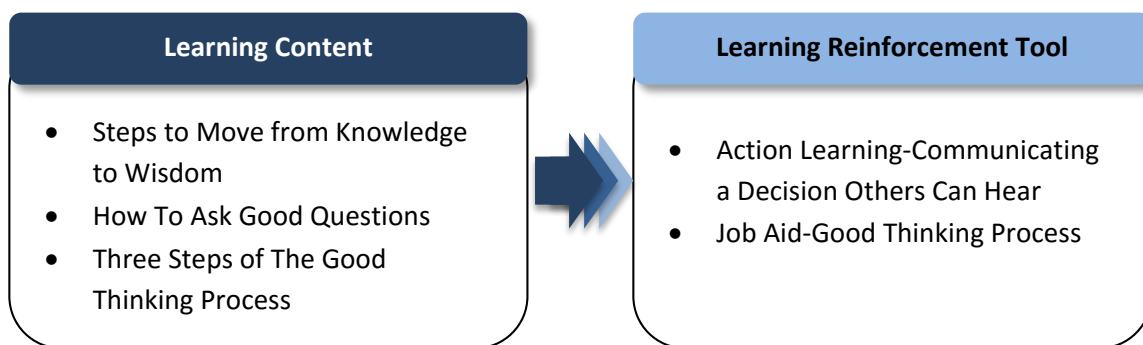

Thinking better is a foundational workplace skill. Almost every part of a job requires the processing of information into knowledge. Highly skilled thinkers convert their knowledge to wisdom and improve their effectiveness by applying their wisdom to new problems and challenges.

The focus of this program is to help participants improve their thinking processes.

Program Outcomes

- Interpret information to create knowledge
- Apply knowledge to create understanding
- Use understanding to generate wisdom
- Communicate a decision others can hear

Learning Process

Program Length 4 Hours

Case Study

A recent Global Corporate College client incorporated Thinking Faster as part of a larger program to enhance the core skills of their associates. Participants included individual contributors, supervisors and technical employees. All found ways to apply the content to improve their ability to think on their feet.
